DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, and 4-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Delzanno et al (US2003/0052499) in view of Bell (US6431628).

Delzanno et al discloses a oven for use in a vehicle having an oven cavity (2) with an air inlet (16, 17) and an air outlet (19), a heating arrangement (3) arranged to maintain a temperature of at least 130 degrees Celsius (para. 0021, lines 18-21), electrically powered heating elements (para. 0021, lines 6-9), heating device is connected to vehicle and powered by motor (para. 0021, lines 1-21), a heat exchanger (3), and a combustion engine (para. 0021). Delzanno et al does not disclose a second heating device, and a control device. Bell discloses a second heating device (column 7, lines 6-10) and a control device (52). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have included a second heating device and a control device as disclosed by Bell in the oven of Delzanno et al because, a second heating device and a control device allow for a more uniform heating.

Response to Arguments

3. In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to SHAWNTINA FUQUA whose telephone number is (571)272-4779. The examiner can normally be reached on Monday-Friday 8-4:30 pm.
